Dear Andy:

We are in the process of revising the new Identi-Kit Handbook. While you were here, we decided to notch the right sides of the chin, eye, and eye-brow foils. The lip foils were questioned. *OK*
Can you give us a confirmation on this at this time?

The inclusion of a woman's hairline illustrating a bun was to be initiated by you; however, we have eliminated two of the typical teen-age hair cuts and are replacing them with a bun. *sent to Mac*

Would you do me a favor and check the Hadley kit that we made up for you and see if the beards are missing. After our discussion in the conference room as to the use of the typewriter case kit, I found an extra set of beards and feel that they might have come from that set that we supplied you. *yes they are missing*

Very truly yours,

25X1
